OBSAH

Contents 3

Preface 5

W. Więsław
Squaring the Circle in XVI–XVIII Centuries 7

W. Więsław
Old Algebraical Treatises 21

K. Mačák
On a Small Comenius' Work 37

W. Więsław
Geometry in Poland in XV–XVIII Centuries 51

M. Hykšová
Bolzano's Inheritance Research in Bohemia 67

E. Fuchs
Otakar Borůvka and French Mathematics 93

W. Więsław
Mathematics at Polish Universities (Cracow and Vilnius)
in the XVIII century 101

P. Drábková
Life and Work of Prof. Miloš Koessler 123

B. Klotzek
Stetigkeit und Unstetigkeit in der Geometrie 131

10th Novembertagung (28. – 31. 10. 1999)

List of Participants 148

Foreword 149

P. C. Kjaergaard
Connections between History and Philosophy of Mathematics 150

T. Sauer
Some Remarks on Hilbert's Axiomatic Method and the Unity of Science 169

H. K. Sørensen
Transformation and Continuity of Mathematics in the 1820s 178

H. Durnová
Change in Progress: Notation and Algorithms 186

H. Gropp
H. Gropp: „Vielleicht für menschliche Kräfte unausführbar" – A Mathematical Proof of a Danish Astronomer 196

Abstracts 202

11th Novembertagung (2. – 5. 11. 2000)

List of Participants 210

Foreword 211

Letter to the 11th Novembertagung Participants 212

W. Więsław
Beginnings of the Calculus – The First Published Books 214

F. Böttscher
Mathematische und Physikalische Literatur des 18. Jahrhunderts für Gebildete – Weibliche – Laien 221

L. Rodríguez
Überlegungen zum Raumbegriff bei H. Poincaré und F. Riesz 232

H. Gropp
The Development of Notation in Graph Theory in Different Languages 238

L. Stachovcová
Mathematicians on Cryptology 244

Š. Bilová
Lattice Theory – Its Birth and Life 250

M. Hykšová
Life and Work of Karel Rychlík 258

R. Krömer
The Metaphor of Tool and Foundation of Mathematics 287

L. Čechová
The First Czech Textbooks on the Differential Geometry 296

Abstracts 306
